LEATHER (BONDED) Kent Collection

Bonded leather or reconstituted leather is a material made of varying degrees of genuine leather combined with other substances to give the appearance of leather at reduced cost. The polyurethane surface is stamped to give it a leather texture. Suitable for all climates, bonded leather is strong enough to use in all applications including commercial areas.

Content: Bonded Leather

- Thickness: 1,10±5% (mm)
- Abrasion: 200000 Cycles
- Flammability: California Technical Bulletin 117, Section E 191-53
- Maintenance: occasional dust cleaning with a clean white cloth is recommended. If needed, apply soapy water, followed by wiping down with clear water and drying.
